SUMMARY

Aspiring AI Engineer with a background in Artificial Intelligence and Data Science, possessing a strong foundation in machine learning, data analysis, and problem-solving. Skilled in Python, SQL, and developing AI-based applications, with hands-on experience through academic projects and internships. Seeking an opportunity to apply technical skills and contribute to organizational growth.

EDUCATION

B.Tech – Artificial Intelligence and Data Science
Anna University – M.A.M College of Engineering (2022 – 2026)
CGPA: 8.1

INTERNSHIP

AI & Robotics Intern – ARAI Solutions (Dec 2025 – Present)
Worked with Large Language Models (LLMs) to extract and generate structured information from unstructured documents using a retrieval-based approach.
Developed a web-based interface and contributed to AI and robotics projects, gaining experience in automation, data processing, and intelligent systems.

Intern – TechShikSha (Aug 2024 – Sep 2024)
Worked on Natural Language Processing (NLP) and document intelligence applications and participated in an industry visit to Microsoft, gaining exposure to corporate workflows and emerging technologies.

PROJECTS

AI-Based Heart Disease Diagnosis from X-rays

Developed a CNN-based system for automated heart disease detection from chest X-ray images with a web interface for prediction and diagnostic support.

Autonomous UGV with SLAM, Navigation, and Web-Based Remote Control Interface

Built an autonomous robotic vehicle using LiDAR-based SLAM for real-time mapping and obstacle-aware navigation.
Developed a web-based dashboard with live video streaming, remote control, and gesture-based interaction using computer vision.

LLM-Based Document Processing System

Developed a web-based application using open-source LLMs to process and extract structured content from uploaded documents (PDFs, text).
Enabled generation and download of outputs such as summaries, instructions, quizzes, and flashcards through a local deployment.

CERTIFICATIONS

- Microsoft Certification: Create an Intelligent Document Processing Solution with Azure Document Intelligence
- Microsoft Applied Skills: Build a Natural Language Processing Solution with Azure AI Language

TECHNICAL SKILLS

- Python (Matplotlib, NumPy, Pandas, Seaborn)
- Data analytics
- Machine learning (Scikit-learn)
- Deep learning (Tensorflow, Keras)
- SQL

LANGUAGES

- English
- Tamil
